

L&T Semiconductor partners with CP PLUS for Next-Gen IP Cameras

Strategic three-year agreement strengthens India's semiconductor ecosystem and enhances security surveillance capabilities

Mumbai, 15th October, 2025: L&T Semiconductor Technologies (LT SCT), a wholly owned subsidiary of Larsen & Toubro has entered into a strategic partnership with CP PLUS, India's leading security and surveillance brand [owned by Aditya Infotech Ltd (AIL)]. Under this agreement CP PLUS will manufacture nine million CCTV IP cameras over the next three years, powered by LT SCT's indigenously designed Vision System-on-Chip (SoC) technology.

This collaboration represents a significant advancement in India's pursuit of self-reliance in semiconductor innovation. The SoCs developed by LT SCT support high-resolution imaging of up to eight megapixels ensuring superior image clarity for critical surveillance applications. Built with advanced cryptographic architecture, the chips provide robust protection for sensitive data and enhance cybersecurity across surveillance systems. Designed entirely in India, the SoCs reflect the spirit of technological sovereignty and align closely with the Government's vision of an *Atmanirbhar Bharat*.

Mr. Sandeep Kumar, Chief Executive, L&T Semiconductor Technologies Ltd., commenting on this landmark partnership said: "Our alliance with CP PLUS underscores the power of collaboration between two Indian leaders in technology and innovation. At LT SCT our mission is to design semiconductors that are not only energy-efficient and high-performing but also foundational to India's technological sovereignty. This partnership with CP PLUS allows us to take our India-designed Vision AI SoCs into millions of surveillance cameras that protect lives and assets daily. Together we are setting new benchmarks in secure high-resolution, AI-powered surveillance, while also nurturing India's semiconductor ecosystem. This is more than a business partnership—it is a commitment to building trusted future-ready technology for India and the global stage."

Aditya Khemka, Managing Director, Aditya Infotech Ltd added: "This alliance represents a significant step forward in our commitment to delivering world-class security solutions powered by Indian innovation. At CP PLUS our vision has always been to not only serve the security needs of today but to anticipate the challenges of tomorrow. By integrating LT SCT's advanced SoC technology we are creating surveillance solutions that are smarter, more secure and built on India's own technological foundation. This collaboration extends beyond product innovation reflecting our intent to contribute meaningfully to India's semiconductor journey strengthen data security for millions of users and reinforce our position as a global leader proudly building in India for the world."

This strategic agreement brings together CP PLUS and LTSCT's expertise in surveillance solutions and advanced semiconductor design. The collaboration is expected to strengthen India's position in the global semiconductor and security supply chain, reduce reliance on imported chipsets, and foster innovation and employment in the domestic electronics sector.

About L&T Semiconductor Technologies (LTSCT)

L&T Semiconductor Technologies (LTSCT), a fully owned subsidiary of L&T, is the first major Indian Semiconductor product company - a fabless company for designing & delivering Smart Devices for Global Customers. A company that provides Semiconductor Devices and Technology partnerships by helping customers realise energy efficient, high-performance systems to benefit from data, electrification and software defined technology trends. Our aim is to build an India-based semiconductor portfolio of Smart Devices across MEMS Sensors, Power, Analog Mixed Signal & RF products, to support Automotive, Industrial, Energy and Telecommunication verticals. We have a presence in four prominent geographies i.e. US, Europe, Japan and India, with offices in Austin, Munich, Tokyo, Bangalore and Chennai.

About Aditya Infotech Limited:

Aditya Infotech Limited (BSE: 544466 | NSE: CPPLUS) offers a comprehensive range of advanced video security and surveillance products, technologies and solutions for enterprise and consumer segments under the CP PLUS brand. In addition, we provide solutions and services including fully integrated security systems and Security-as-a-Service directly and through our distribution network to address the requirements of end-customers across a broad range of sectors. With India's largest integrated manufacturing facility at Kadapa, Andhra Pradesh and the largest portfolio of STQC certified products, CP PLUS is leading the "Make in India" and Atmanirbhar Bharat initiatives.
