# Consumer Electronics Show 2026: Key Highlights of LTSC Participation

8–9 January 2026 | Las Vegas, USA

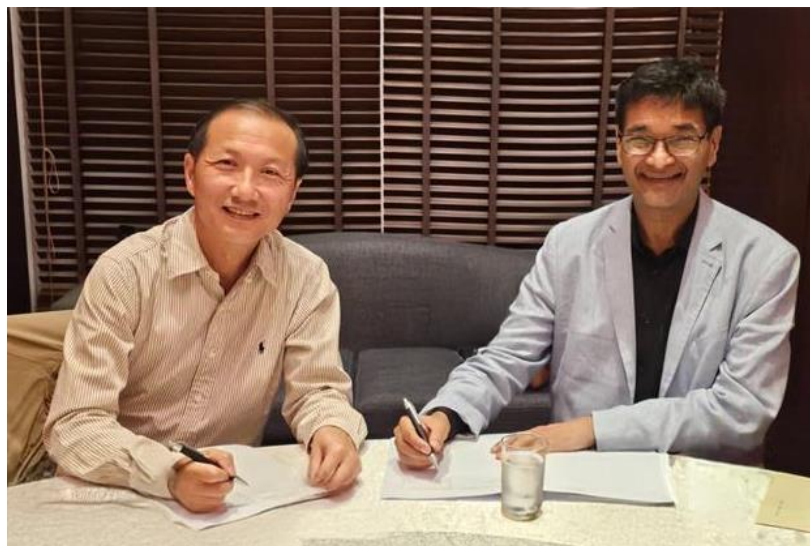

LTSC showcased a strong presence at **CES 2026**, one of the world's most influential technology events, bringing together industry leaders, innovators, customers, and partners from across the global technology ecosystem. The event provided a strategic platform for LTSC to unveil key business initiatives, demonstrate innovative solutions, engage with customers, and strengthen industry relationships.

## Strategic Announcements

CES 2026 served as an important platform for LTSC to advance its strategic growth agenda through two significant announcements.

### Strategic IP Licensing Agreement with Andes Technology

LTSC announced the signing of a **Strategic IP License Master Agreement with Andes Technology**, establishing a long-term collaboration to accelerate the development and commercialization of advanced **RISC-V-based semiconductor solutions**. The partnership aims to drive innovation, reduce time-to-market, and enable scalable customization for customers across global markets.

## Launch of LTSC's Cellular IoT Module Business

LTSC announced the launch of its **Cellular IoT Module Business**, further expanding its semiconductor portfolio. As part of the launch, the company unveiled its first cellular module powered by the **Qualcomm® QCM2290** platform. The solution is designed to enable OEMs to integrate connectivity quickly, cost-effectively, and at scale across applications such as energy meters, industrial sensors, and connected vehicles.

## Product Demonstrations

Throughout the event, LTSC teams conducted live product demonstrations, providing customers and partners with an opportunity to experience the company's latest innovations firsthand. The showcased solutions included: Fast Charging Adapter, Smart Ceiling Fan Solution, In-Vehicle Smart Charging, SAC20 Smart Module, LCC40 Connectivity Module, and Power Modules.

## Customer Engagement and Media Interactions

CES 2026 witnessed strong engagement from customers, partners, and ecosystem stakeholders visiting the LTSCCT booth. The event facilitated productive discussions around emerging market opportunities, customer requirements, and technology adoption across industries.

In addition, LTSCCT leadership engaged with leading global media representatives, sharing perspectives on the company's technology roadmap, recent business expansions, strategic partnerships, and future growth plans.
