

CII IndiaEdge 2025 Summit

Dec 4, 2025 | New Delhi, India | Panel Discussion

LTSCCT participated in the CII IndiaEdge 2025 Summit, contributing to a high-impact panel discussion titled "From Chips to Circuits: Powering India's Electronics Revolution." The session brought together leading voices from across India's electronics and semiconductor value chain to discuss the country's growing role in the global electronics ecosystem.

The discussion explored the evolution of India's semiconductor and electronics landscape, spanning chip design, semiconductor manufacturing, components, systems, and electronics manufacturing services (EMS). Industry leaders shared perspectives on how innovation, capability expansion, strategic investments, and supportive policy initiatives are positioning India as a key hub within global value chains.

Highlights

Panel Discussion
