
Mobile World Congress (MWC) 2026

2–5 March 2026 | Barcelona, Spain

LTSC participated in **Mobile World Congress (MWC) 2026**, one of the world's leading events for connectivity and intelligent technologies, reinforcing its commitment to advancing next-generation semiconductor and connectivity solutions. The event brought together global leaders from the telecommunications, semiconductor, and technology ecosystems to explore innovations shaping the future of connected intelligent systems, edge computing, and digital transformation.

A key highlight of LTSC's participation was its strong on-ground presence through a dedicated booth and meeting space, enabling engagement with global telecom leaders, customers, partners, and ecosystem stakeholders. The event provided a platform to showcase LTSC's capabilities in connectivity solutions and strengthen strategic industry collaborations.

Highlights

Product Launch

Product: *LCC40 LTE Cat-1 bis IoT Module*

At MWC 2026, LTSC unveiled the **LCC40 LTE Cat-1 bis IoT Module**, designed to support India's accelerating 2G-to-4G migration and address real-world connectivity challenges. Engineered to deliver reliable performance while addressing RF sensitivity, OTA reliability, power consumption constraints, roaming requirements, and certification complexities, the module enables scalable and cost-effective IoT deployments across diverse applications.
